- Developed html views with HTML5, CSS3, JSON, and JavaScript.
- Developed Container components as the logic layer for UI components.

experience

05.2019 - Present **Tutor** - Didgital Career Institue (DCI)

At DCI each class has its own tutor. In a class of 15 students I was chosen to be the class tutor and have been able to assist my peers with projects and challenges from the DCI curriculum. I have always been given great feedback from my peers and my mentor. As a tutor, one of the best and unexpected skill I learned, is to learn by explaining.

Eudcation

02.2019 - Present **Didgital Career Institue** - Full Stack web development (MERN-stack)
Curriculum: HTML5, CSS3, Javascript, Bootstrap, SASS, Git, NodeJS, Express, MongoDB, ReactJS, Testing, deployment and project management

07.2017 - Present **Online Education**
Since 2017 I've done web-development courses online. I succesfully finished courses on sites like Udemy, Pluralsight and FreeCodeCamp. The skills I gained during these courses led me to be my current position as a Tutor.

Languages

- Dutch - *native*
